TUNE YOUR ZERO.

Performance. Style. Make ZERO yours.

Start with the feel you want to change.
Build your ideal ZERO, one part at a time.

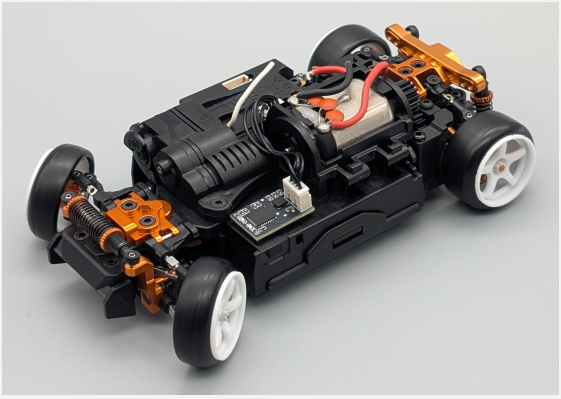

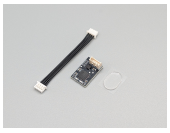

Photo: Optional parts fitted (Front Monoshock / Rear Unit).

01 Tune the handling. Enjoy the setup.

All prices include Japanese tax

DDL-DDG001 ¥5,720

Dori Dori Gyro

Reduces small steering oscillations for straight running and drift control.

MA-020 blue/white antenna boards.
Not for EVO/PRO; do not use with OP001.

MRD-OP009 ¥660

Front Spring Set

Three rates to tune weight transfer and suit your chassis width.

Red: Soft / Green: Medium / Yellow: Hard

MRD-OP007 / OP008 Each ¥1,320

Turnbuckle Set

Adjust length without removing rods.

OP007: Standard width
OP008: Wide width

MRD-OP005 ¥3,080

Front Monoshock Set

Links both sides with one shock for realistic body roll.

Intermediate/advanced; gentler steering

MRD-OP003 / -N / -W Set ¥1,320

Drift Tires

Rounded POM profile improves control.

OP003: 2 narrow + 2 wide
-N: 8.5mm / -W: 11mm; 2 pcs/pack, ¥770/pack

MRD-OP006 ¥330

Rear Spring Set for MINI-Z AWD

Balances rear grip and control.

Kyosho standard rear / DWS: 2 springs each
Not for the MRD Rear Unit

MRD-OP002 ¥1,320

MRD Balance Weights

Tune roll and rear tire grip by changing weight and position.

5g × 2 / Kyosho standard rear and DWS

MRD-OP014 ¥660

Shock Adjusters Orange

Add orange accents to your shocks.

4 pcs / MRD front and rear shocks

02 Improve precision and rigidity

MRD ZERO front end & drivetrain

MRD-OP025 ¥3,080

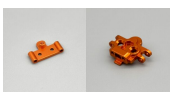

Alloy Steering Wiper

Reduces play for precise response and less steering oscillation.

Brass posts included

MRD-OP011 / OP013

Alloy Suspension Holders

Holds suspension arms securely for precise control response.

OP011 Lower ¥1,100 / OP013 Upper ¥2,750

MRD-OP012 ¥990

Alloy Counter Gear Holder

Holds gear shafts securely for smooth rotation and power transfer.

MRD-OP010 ¥1,980

Alloy Knuckle Arm Set

Holds axles precisely; reduces tie-rod interference for more steering angle.

MRD-OP004 ¥880

Alloy Front Shock Stay

Strengthens the shock mounts for greater durability.

For the standard twin-shock setup

MRD-AC001 ¥660

Shim Set 3×5mm

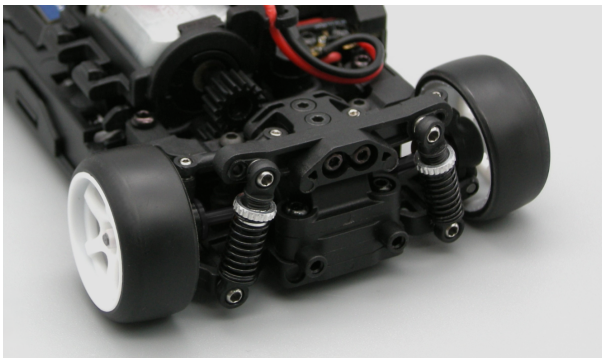

Fine-tune side play in front/rear wheel shafts and other assemblies.

0.1 / 0.2 / 0.3mm thick; 10 each

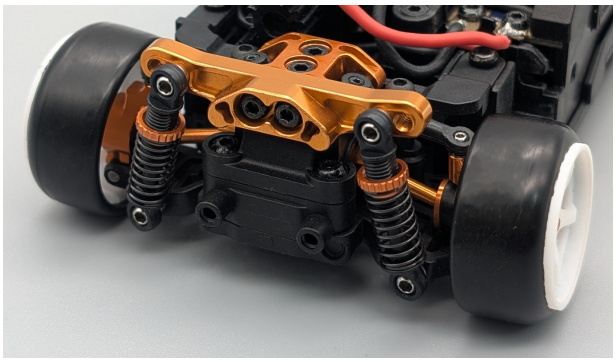

START HERE Refine control: Gyro & tires | Change handling: Springs & weights

Transform the drive from the rear.

All prices include Japanese tax

STANDARD / STANDARD SETUP

CUSTOM / OPTIONAL PARTS FITTED

Photos show installation examples. Chassis, wheels, tires and other items are not included in the Rear Unit Kit.

No.1004

Rear Unit Assembly Kit Ver.1.1

¥7,480

Six wheelbases and adjustable rear grip characteristics expand your setup options.
Fits MRD ZERO. Ver.1.1 includes steel universal swing shafts as standard.

03 Options for the MRD Rear Unit

For vehicles fitted with No.1003 / 1004

MRD-OP017 ¥3,080

Alloy Rear Upper Suspension Holder
Increases mounting rigidity and stabilizes rear hub position.

MRD-OP018 ¥3,300

Alloy Rear Shock Stay
Stabilizes suspension movement. Added weight improves rear grip.

MRD-OP019 ¥880

Alloy Diff Cup Joints
Improves rotational precision and reduces swing-shaft wobble.
2 pcs

MRD-OP022-10 / -30 Each ¥1,980

Alloy Rear Lower Suspension Holder
Rigidly supports the suspension arms.
OP022-10: 1° total toe angle
OP022-30: 3° total toe angle

MRD-OP023 ¥880

Turnbuckle Set (Rear Unit)
Adjust length without removing rods.
Includes 2 narrow and 2 wide rods

MRD-AC002 ¥660

Shim Set 5×7mm
Fine-tune side play in the rigid axle.
0.1 / 0.2 / 0.3mm thick; 10 each

MRD-OP015 ¥1,320

Universal Wheel Shafts Orange
Dress up the shafts and joints with orange accents.
2 sets

MRD-OP016-S / -M / -L Each ¥1,320

Swing Shafts Orange
Give your drivetrain a matching orange look.
S / M / L: 2 pcs each. Check the manual for the length to suit width and hub position.

HEX Drivers for Assembly & Adjustment
No.3002 0.9mm ／ No.3003 1.5mm
Precision, high-strength bits. ¥1,320 each
